

Client Platform Work Flow

1 Client Platform Work Flow

1. All portions of the project to update automatically across all users upon any modification.
2. If Registered Municipality is null to the Clients District. We should put an sample email request for the client to the municipality stating that they would like to use the software for submissions.
3. If the software is not registered in the Municipality. We would need to find a niche for change for the software usage. But its free if the county is registered.
